

Anunta Health Check & Diagnostics

Find the fix. Fast.

You already know something is wrong. The dashboards look green, but users are still complaining. Logins are slow. Performance is unpredictable. You've ruled out the usual suspects—and you're still stuck.

Anunta's Health Check & Diagnostics is designed for teams like yours. We go deeper, faster, and with VDI expertise that generalist providers can't match.

What You Get

A comprehensive diagnostic of your virtual desktop environment—including:

Environment Review

Deep dive into image, policy, profile, and authentication setup

User Experience Diagnostics

Session logs, latency trends, disconnect analysis, and UX patterns

Security & Access Control Audit

End-to-end auth flow mapping to uncover hidden friction

Risk & Misconfiguration Review

Identify legacy settings, patch-work fixes, and performance drift

Remediation Roadmap

Clear, prioritized next steps -mapped to real-world impact

A Few of Our Technology Partners

omnissa | vmware by Broadcom | Microsoft | Google Cloud | aws

What to Expect

1. Discovery Call
2. Diagnostics (non-disruptive)
3. Findings Review + Remediation Plan

This is a standalone engagement. You decide what comes next.
